

ABSTRACT OF THE DISCLOSURE  
ASSEMBLY ARRANGEMENT FOR BLADES WITH ADJUSTABLE SETTING

The pivots (2) of the blades (1) comprise removable portions (16) located at their outer end and adjustable in height using a thread (17) or a similar means in order to adjust the distance between the head (9) of a lever  
5 (10) controlling the adjustment of the blade and the casing (4) or the collar (8) of a bearing (5); if the centring bushings (7) of the bearings (5 and 6) are worn, harmful tilting of pivots (2) will be limited by a stop for the head (9).
